Application No.: 09/986,634

## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application.

## **LISTING OF CLAIMS:**

- 1-15 (canceled).
- 16. (withdrawn) A method for preparing a lysate of an HIV-2 virus, said method comprising:
- (a) providing a biological sample that comprises human CD4+ lymphocytes infected with HIV-2 virus;
  - (b) separating said virus from said human CD4+ lymphocytes;
- (c) centrifuging said separated virus to form a fraction comprising concentrated virus;
  - (d) isolating said fraction comprising concentrated virus; and
  - (e) lysing said virus.
- 17. (withdrawn) The method of claim 16, wherein said method comprises centrifugation on a sucrose gradient.
- 18. (withdrawn) The method of claim 16, wherein said method comprises pelleting said virus.
  - 19. (withdrawn) The method of claim 16, wherein the virus is lysed with SDS.
- 20. (withdrawn) The method of claim 16, wherein said lysate comprises HIV-2 RNA.
- 21. (withdrawn) The method of claim 16, wherein said lysate comprises HIV-2 p26 antigen.

22. (currently amended) A method for producing an HIV-2 peptide comprising cloning an HIV-2 cDNA that comprises a fragment of HIV-2 ROD nucleic acid deposited at the C.N.C.M. under Accession No. I-627 into a vector, introducing the recombinant vector into a host cell, and expressing the HIV-2 peptide encoded by the recombinant vector,

wherein said fragment of HIV-2 ROD nucleic acid deposited at the C.N.C.M. under Accession No. I-627 hybridizes to a greater extent to the genomic RNA of HIV-2 ROD than to the genomic RNA of HIV-1 BRU under hybridization conditions of 37°C for 16 hours in 5X SSC, 5X Denhardt solution, 25% formamide, and 100 μg/ml denatured salmon sperm DNA, with washes in 2X SSC, 0.1% SDS at 25°C; 1X SSC, 0.1% SDS at 60°C; or 0.1X SSC, 0.1% SDS at 60°C.

- 23. (previously presented) The method of claim 22, wherein said host cell is a bacterial cell.
- 24. (previously presented) The method of claim 22, wherein said host cell is a yeast cell.
- 25. (previously presented) The method of claim 22, wherein said host cell is an animal cell.
  - 26. (withdrawn) A peptide produced by the method of claim 22.
  - 27. (withdrawn) A peptide produced by the method of claim 23.
  - 28. (withdrawn) A peptide produced by the method of claim 24.
  - 29. (withdrawn) A peptide produced by the method of claim 25.
